

**HALLIBURTON**

The following data supplied by Halliburton represents 1.5 million hours of combined equipment time and 30,000 job or work order engagements. There are many metrics associated with the Run Efficiency data and overall Operating Efficiency; however downtime lost is the most direct indicator for ROI. Since 2008, when Halliburton first integrated TPC Operate as performance support solution, Halliburton has witnessed a significant reduction in downtime lost.

	<b>2008</b>	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2012</b>
Lost Time Run Count	60	66	60	86	54
Run Efficiency	99.4%	99.57%	99.79%	99.91%	99.95%
Total Hours Lost	357	329.2	231.3	368	212.8
Operating Efficiency	98.9%	99.92%	99.94%	99.97%	99.99%
