

Instructor Support Materials

Everything you need to teach technical skills classes

Schoolcraft Publishing's affordable instructor support materials increase your students' comprehension of important technical subjects by helping you tailor each topic to their needs. As a versatile addition to vocational and CTE lectures, Schoolcraft's instructor support materials are a valuable addition to any textbook and work within all classroom environments.

Lesson Plans

- Each lesson plan reflects content from your corresponding textbook
- Spiral bound book to easily lay open on your desk
- Large font for reading from a distance
- Cues for when to ask questions, discuss a topic, or show a figure
- Bold text to easily find important terms
- Space for notes

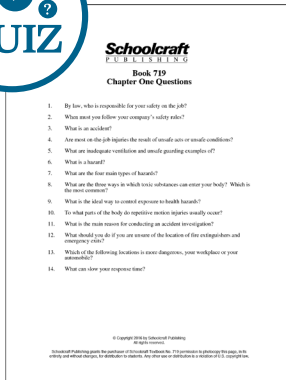

Both veteran and first-time instructors find our lesson plans helpful when reviewing for and planning course discussions.

PowerPoint™ Presentations

- Slides contain every chart, graph, and picture from within the text
- Create “aha” moments as students can see principles in action
- Build strong student retention of important concepts
- Add these customizable slides to current presentations to create a tailored learning experience for students
- Animated PowerPoints are also available for some topics

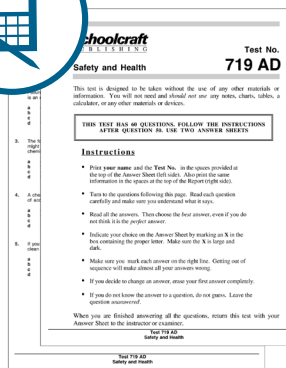

Multimedia tools from Schoolcraft drive retention of key technical concepts.

Chapter Quizzes

- Questions are presented in short answer format
- Most chapters contain 10-15 Questions
- Perfect for use as review questions, quizzes, or as an addition to any exam
- The included answer sheet references the location each answer is mentioned within the corresponding textbook
- Can be provided in Printed or Digital format

Easily review important concepts at the end of every chapter.

Testing / Final Exams

- Questions are objective in a multiple choice format
- Every chapter from the corresponding textbook is represented with 5 questions on the final test
- Each question contains only one correct answer
- Clear and concise question stems with distracters that are all plausible, yet contain only one correct answer
- All answer options are listed in alphabetical/numerical order so students cannot “psych-out” the test.

Assessment testing ensures comprehensive understanding of technical topics.
