

FUSION

TPC Fusion is a comprehensive, user-friendly software application that integrates our suite of workforce management solutions for the administration, documentation, tracking, reporting, assessment, and delivery of training programs and performance and compliance solutions.

Why Fusion?

Fusion incorporates all of our digital offerings in one system in a central, securely hosted environment. You can effectively manage your comprehensive training, safety, and compliance needs across your facility and your enterprise, saving time and resources.

Fusion Delivers

- More than 1,000 detailed technical courses and OSHA-authorized 10- and 30-Hour training lessons from our proprietary library
- Best-in-class learning management features
- User-friendly intuitive design for both administrators and employees
- Integration capabilities to build your own courses and content
- TPC's EHS workforce software management solutions including mobile forms, skills verification, contractor management, incident management, and employee safety and performance

- Centralized platform inclusive of your HRIS system
- Customized test-building using Testmaster™, to create and deliver your own assessments

The Results

When you adopt and integrate Fusion to streamline your workforce training management, you experience peace of mind knowing you are providing your workforce with more than just training; you are improving their livelihood by advancing their careers, which increases retention, expedites knowledge transfer, and enhances safety and performance—ultimately, leading to the overall success of your company.

TPC, your partner in comprehensive workforce performance improvement.

Ready to learn more about how TPC can help you better manage the training, safety, and compliance for your company?

See the impact you can make by scheduling a customized demo of Fusion.
